**Re: Notice of Filed Request for Board Review and Rebuttal Opportunity  
Decision Summary LA19036 / Arie and Willemina Muilwijk**

Hello,

Thank you for the opportunity to comment on the above noted issue.

Concern about the water quality in the water table that supplies our well is my primary concern. There is a demonstrated, documented history by the applicants of ignoring requirements and regulations that are in place for the protection of all. In light of this and the fact that this project has continued to be built without the proper authorizations in place, even after contact from the governing body demonstrates intent to continue the illegal activities. Also as proper data on the building of the waste containment and other things does not appear to have authoritative inspection data, the possibility of contamination cannot be reasonably downplayed.

What safeguards are there for people affected by this endeavour to make sure future actions will be legal and requirements adhered to? What checks and balances are there to prevent further disregard for legal requirements and public safety? Who pays for regular checks of household water to ensure the safety of the families in the areas?

Thank you for taking these concerns into consideration.

John Green
