RE: REBUTTAL OPPORTUNITY - LA19036/ARIE AND WILLEMINA MUILWIJK

We would like to make record that we stand by our concerns and comments in our letter written to Adria Snowdon, Approval Officer.

Our most important concern is preserving the quality of our water supply. It's a big concern for the surrounding area. This concern grows with each of the confined feeding operations in the area as they continue to grow. There is more than one feeding operation in proximity of each other. It is relevant that there is no concern from the owners to follow procedure and protocols that protect the quality of water. This given application being an example. The applicant has also mined for gravel/dug out just downhill of their lagoon which highly risks our water supply. Once the water table has been contaminated there is no fixing it.

We also have concerns with poor waste management, making disease a high risk as discussed in our previous letter.

If you would like to discuss further, please feel free to contact us.

Sincerely,

Dean & Hannah Brauer
