Alberta T0C-2V0

We are directly affected! We are acreage owners. There is concern of our water wells been affected. There will be concern of the catch basin when we get periods of a lot of rain.

The value of selling our property could be affected with this large feedlot. There will be increased traffic on our roads. Wear & tear & safety??? This operation is way too close to Pigeon Lake! Huge problem of manure waste going into the lake.

Regards Nina Thomas
