Hey Guys

I just wanted to respond with we are doing everything we can to properly complete the process. We have plugged off the culvert to prevent any water going under the road from our seasonal pens into Clarks slough. This should clear off any concerns.

I wanted to note that my kids 4-H animals and their special show animals go into this seasonal pen time to time and drink the water from the sloughs that overflow and were running onto Clarks land. I have that much confidence there is no contamination and the water is safe for use.

Please reach out if there is anything more required of me, or if i can help in any way

Thank you

Craig
