Dear Ms. Howe:

Subject: Technical Review of the Information Request Responses for the Springbank Off-Stream Reservoir Project – Information Request Package 4

Please find enclosed, Alberta Transportation's submission of responses to IR4-01 to IR4-04 from *Information Request Package 4 – Technical Review Round 2 Springbank Off-Stream Reservoir Project* dated March 23, 2020. Alberta Transportation will be submitting the response to IR4-05 under a separate cover when complete.

In addition, this submission contains an Introduction (Section 1) that summarizes Project changes that have occurred since filing the environmental impact assessment (EIA) in March 2018 and the addendum on the debris deflector in May 2018. These changes are the result of on-going engineering design for the Project. An evaluation of each Project change relative to the conclusions of the EIA for each valued component is also included.

We trust the enclosed is satisfactory. Should you have any questions or concerns regarding the submission, kindly contact me at 780-644-7780, or by email at matthew.hebert@gov.ab.ca.

Sincerely,

<Original Signed>

Matthew Hebert
Executive Director, Transportation Policy
Transportation Services Division
Alberta Transportation
