Re: SR1 NRCB Application No. 1701
City of Calgary Undertaking Response; page 1294 of Volume 5 of the Transcript

Dear Mr. Secord,

During your cross-examination of the City's witness, Frank Frigo, on Topic 3 in the above-noted application, Mr. Frigo provided the following undertaking:

To advise the percentage of the catchment area that MC1 would capture subject to check with Counsel.

Mr. Frigo has now had an opportunity to review the exhibits and the City is in a position to respond. As referenced in Exhibit 3, pdf page 79 (report page 3.4), "The Elbow River has a watershed area of 702 km² upstream of the [MC1] dam site (Opus 2017a)." In the same exhibit, pdf page 60 (report page 2.4), "The total watershed area upstream of Glenmore Reservoir (and the city of Calgary) is 1,217 square kilometres (km²)." As such, the percentage of the total Elbow River catchment above Calgary that lies upstream of the proposed MC1 dam site is 58%, and not 96% as was suggested to Mr. Frigo in cross-examination.

Yours truly,

KSMunkittrick
