Application under the Agricultural Operation Practices Act for a confined feeding operation, manure collection area, and/or manure storage facility(ies)

DECLARATION AND ACKNOWLEDGMENT OF APPLICANT CONCERNING WATER ACT LICENCE

issued by Alberta Environment and Protected Areas (EPA) for a confined feeding operation (CFO)

Date and sign one of the following four options

Date and sign one of the following four options
OPTION 1: Applying through the NRCB for both the AOPA permit and the Water Act licence
I DO want my water licence application coupled to my AOPA permit application.
Signed thisday of, 20
OPTION 2: Processing the AOPA permit and Water Act licence separately
 I (we) acknowledge that the CFO will need a new water licence from EPA under the Water Act for the development or activity proposed in this AOPA application. I (we) request that the NRCB process the AOPA application independently of EPA's processing of the CFO's application for a water licence. In making this request, I (we) recognize that, if this AOPA application is granted by the NRCB, the NRCB's decision will not be considered by EPA as improving or enhancing the CFO's eligibility for a water licence under the Water Act. I (we) acknowledge that any construction or actions to populate the CFO with livestock pursuant to a AOPA permit in the absence of a Water Act licence will not be relevant to EPA's consideration of whether to grant the Water Act licence application. I (we) acknowledge that any such construction or livestock populating will be at the CFO's sole risk if the Water Act licence application is denied or if the operation of the CFO is otherwise deemed to be in violation of the Water Act. This risk includes being required to depopulate the CFO and/or to cease further construction, or to remove "works" or "undertakings" (as defined in the Water Act). AS RELEVANT: I (we) acknowledge that the CFO is located in the South Saskatchewan River Basin and that, pursuant to the Bow, Oldman and South Saskatchewan River Basin Water Allocation Order [Alta. Reg. 171/2007], this basin is currently closed to new surface water allocations. Provide: Water licence application number(s)
Signed this day of
OPTION 3: Additional water licence not required
 I (we) declare that the CFO will not need a new licence from EPA under the Water Act for the development or activity proposed in this AOPA application. Provide: Water license number(s) or water conveyance agreement details
Signed this day of, 20

Signature of Applicant or Agent

Application under the Agricultural Operation Practices Act for a confined feeding operation, manure collection area, and/or manure storage facility(ies)

OPTION 4: Uncertain if Water Act licence is needed; acknowledgement of risk (for existing CFOs only)

- At this time, I (we) do not know whether a new water licence is needed from EPA under the Water Act
 for the development or activity proposed in this AOPA application.
- If a new Water Act licence is needed, I (we) request that the NRCB process the AOPA application independently of EPA's processing of the CFO's application for a water licence.
- In making this request, I (we) recognize that, if this AOPA application is granted by the NRCB, the NRCB's decision will not be considered by EPA as improving or enhancing the CFO's eligibility for a water licence under the Water Act.
- 4. I (we) acknowledge that any construction or actions to populate the CFO with additional livestock pursuant to an AOPA permit in the absence of a Water Act licence will not be relevant to EPA's consideration of whether to grant my Water Act licence application, if a new water licence is needed.
- 5. I (we) acknowledge that any such construction or livestock increase will be at the CFO's sole risk if the Water Act licence application is denied or if the operation of the CFO is otherwise deemed to be in violation of the Water Act. This risk includes being required to depopulate the CFO and/or to cease further construction, or to remove "works" or "undertakings" (as defined in the Water Act).
- AS RELEVANT: I (we) acknowledge that the CFO is located in the South Saskatchewan River Basin and that, pursuant to the Bow, Oldman and South Saskatchewan River Basin Water Allocation Order [Alta. Reg. 171/2007], this basin is currently closed to new surface water allocations.

Minimum Distance Separation (MDS) Waiver (declaration)

Applicant information NRCB application number:
Operator/operation name: Reimer Agriculture Ltd.
Address: _ Postal Code:
Legal land location of confined feeding operation: SE 36 - 44 - 23 - W-1
I have requested the residence owner(s) named below to waive the required minimum distance separation (MDS) to their residence for the <i>Agricultural Operation Practices Act</i> (AOPA) permit application identified above. In making this request, I have provided the owner(s) with an opportunity to review my permit application and a copy of the Natural Resources Conservation Board (NRCB) Fact Sheet "Minimum Distance Separation (MDS) Waivers" available on the NRCB website at www.nrcb.ca. I have also explained:
 The MDS requirement set out in section 3 of the Standards and Administration Regulation of AOPA. I have advised the owner(s) that section 3(6)(a) of the Standards and Administration Regulation allows this requirement to be waived by the owners of residences, if they agree in writing to grant a waiver;
That my proposed development does not meet the required MDS to the owner's residence; and,
 That this waiver applies only to this application as described. An increase in livestock capacity, annual manure production, level of odour production, change to the site plan or change to a facility that would increase the MDS would require a new waiver.
Following is a summary of the proposed development:
The current scope of my confined feeding operation (CFO), including the type, number, and category of livestock, if any, is: Correct 31480 Bio; ler Bieeders.
My application for a new AOPA permit proposes the following changes to the existing livestock category, type and/or capacity at my CFO: Change to 110 000 Broilers. Change floor level in Barn 18 (so th Barn)
The proposed new CFO facility(ies), or changes to the existing CFO facilities, including manure storage, manure storage volume and any other pertinent details, if any, are (attach a site layout plan if available): Same Manure Storage building (South Born) Level floor instead of Pits.
I the applicant understand that the waiver is not valid unless ALL registered owners of the residence sign this document.
Permit Applicant: Date: Date:
Residence owner(s) to initial:
