

Regarding Approval R24018  
NE-19-42-26 W4M

### **Leak Detection Groundwater Monitoring Requirements**

The purpose of this statement is to revise the leak detection groundwater monitoring requirements in Approval RA24018. Operating condition 9 of Approval RA24018 reads:

***“The owner/operator shall conduct leak detection groundwater monitoring for the earthen manure storage according to a leak detection groundwater monitoring system prescribed and authorized in writing, and as amended from time to time where appropriate, by the NRCB.”***

The NRCB has re-assessed the leak detection groundwater monitoring requirements, using results from an environmental risk screening conducted on November 20, 2024, for this facility.

Based on the risk screening results, the NRCB has determined that the leak detection groundwater monitoring requirements for this facility should be amended as follows:

#### **Monitoring Frequency**

Leak detection groundwater monitoring requirements are suspended

#### **Monitoring Well Test Parameters**

Not applicable, as monitoring is suspended

#### **Monitoring Wells to be used for Monitoring**

Not applicable, as monitoring is suspended

The integrity of all monitoring wells must be maintained. Any damaged or destroyed wells must be reported to the NRCB and may be required to be repaired or replaced.

These monitoring requirements become effective on the date of this monitoring statement and supersede any previously issued monitoring requirements at this facility.

November 29, 2024
