

Total permitted animal capacity from all permits for this site:
22,500 chicken layers

In consideration of Decision Summary LA24049, Registration LA24049 is issued to:

Name: Derk, Martina, and Lloyd Vossebelt (the “co-permit holders”)
Address: Box 734, Coaldale, AB T1M 1M6
Contact person: Lloyd Vossebelt

Permitted construction (based on the submitted site plan):

- Layer barn - 67 m x 14 m and,
- Indoor manure storage (attached to the barn) - 6 m x 6 m

Ancillary facilities:

- Indoor egg collection area, office, cooler and equipment area (inside the layer barn)

The permit holder shall comply with the requirements of the *Agricultural Operation Practices Act* (AOPA) and the regulations passed pursuant to that Act.

The permit holder shall adhere to the descriptions, the site plan, building plans, and other attached documents included with filed Application LA24049.

The permit holder shall contact the NRCB at least 10 working days in advance of the desired inspection date to schedule the inspection in conditions 2 and 5.

Construction conditions

Layer barn

1. The concrete used to construct the liner of the layer barn must meet the specifications for category D (solid manure – dry), in Technical Guideline Agdex 096-93 “Non-Engineered Concrete Liners for Manure Collection and Storage Areas.” The co-permit holders shall provide documentation, confirming that the concrete used for the manure collection and storage areas meets the required specification.
2. The co-permit holders shall not allow livestock or manure in the layer barn until the facility has been inspected by NRCB personnel and confirmed by them, in writing, to have been constructed in accordance with the terms and conditions of this permit.
3. The co-permit holders shall complete construction of the manure collection and storage portions of the layer barn prior to August 31, 2026. Upon request, this deadline may be extended by the NRCB in writing.

Attached Indoor manure storage

4. The concrete used to construct the liner of the attached indoor manure storage must meet the specifications for category D (solid manure – dry), in Technical Guideline Agdex 096-93 “Non-Engineered Concrete Liners for Manure Collection and Storage Areas.” The co-permit holders shall provide documentation, confirming that the concrete used for the manure storage areas meets the required specification.
5. The co-permit holders shall not allow manure to be placed in the attached indoor manure storage until the facility has been inspected by NRCB personnel and confirmed by them, in writing, to have been constructed in accordance with the terms and conditions of this permit.
6. The co-permit holders shall complete construction of the manure storage portions of the attached indoor manure storage prior to August 31, 2026. Upon request, this deadline may be extended by the NRCB in writing.

This registration becomes effective immediately. The registration conditions will remain in effect unless amended in writing by the NRCB.
